SIGNAL PROCESSING

Cumulative contents of Volume 63

Volume 63, No. 1, November 1997

Papers

R. Arnott
Diversity combining for digital mobile radio using radial basis function networks 1
R. Rajagopal, K. Anoop Kumar and P.R. Rao
Signal subspace beamforming in the presence of coherent interferences and unknown correlated noise fields 17
H.-Y. Jung, R. Prost and T.-Y. Choi
A unified mathematical form of the Walsh–Hadamard transform for lossless image data compression 35
G. Bi
Split-radix algorithm for 2-D discrete Hartley transform 45
G.A. Hirchoren and C.E. D'Attellis
On the optimal number of scales in estimation of fractal signals using wavelets and filter banks 55
X. Jian and Y. Baozong
A novel approach to the optimal biorthogonal analysis window sequence of the discrete Gabor expansion 65
P.M. Lapsa
Determination of Gegenbauer-type random process models 73
M.S. Rahman
Fourier analysis of the full-wave rectified matched filter output of a modified chirp-matched filter spectrum analyzer for envelope detection 91
K.-L. Chung and Y.-K. Lin
A generalized piplelined median filter network 101

Volume 63, No. 2, December 1997

Papers

V. Shtrauss
Spectrum analysis and synthesis of relaxation signals 107
J. Bae and I. Song
Rank-based detection of weak random signals in a multiplicative noise model 121
A. Alkulaibi, J.J. Soraghan and T.S. Durrani
Fast 3-level binary higher order statistics for simultaneous voiced/unvoiced and pitch detection of a speech signal 133
A. Fertner
Signal reconstruction algorithm for timing jitter compensation in frequency-domain echo cancellers 141
T. Yang, J.H. Lee, K.Y. Lee and K.-M. Sung
On robust Kalman filtering with forgetting factor for sequential speech analysis 151
L. Moltedo, M. Nappi, D. Vitulano and S. Vitulano
Color image coding combining linear prediction and iterated function systems 157
J. Le Roux and J.L. Peyre
MA HOS modelization from samples of band-limited third-order stationary signals 163
P. Hughett
A representation theorem for local LSI operators on two-sided sequences 169

Elsevier Science B.V.

Volume 63, No. 3, December 1997

Papers

F. Pedersini, A. Sarti and S. Tubaro
Joint automatic design of prefilter and decimation grid for the reduction of spectral redundancy in 2D digital signals 175
D.J. Nott and R.J. Wilson
Parameter estimation for excursion set texture models 199
P. Stoica and A.E. Nordsjö
Subspace-based frequency estimation in the presence of moving-average noise using decimation 211
P. Pesola and H. Olkkonen
Autoregressive state-space approach for numerical signal analysis 221
R.V. Raja Kumar and C.B. Rama Rao
Mean-convergence behavioural analysis of IIR adaptive filters 229
B. Baykal and A.G. Constantinides
Order-recursive underdetermined recursive least-squares adaptive algorithms 241
A. Akan and L.F. Chaparro
Multi-window Gabor expansion for evolutionary spectral analysis 249
M. Ramkumar and G.V. Anand
An FFT-based technique for fast fractal image compression 263
